

iCoat Advantage

OUTSOURCE AR OR IN-HOUSE AR

Whether you choose to outsource your AR coating needs to iCoat or bring AR coating in-house, iCoat offers you the most comprehensive coating programs anywhere in the industry.

Greater depths of AR coating experience and resources:

iCoat brings 20+ years of focused coating experience and coats more than 1.5 million pair of lenses annually. iCoat maintains control of this daily flow of lenses through precise organization, computerized tracking, automation and 24/7 operation.

Wide range of AR coating products:

iCoat offers products ranging from basic hardcoating to the most advanced super hydrophobic, super oleophobic, anti-static, anti-reflective treatments available today.

Versatile & autonomous AR coating technology:

iCoat has developed its own proprietary coating technology to work on the widest variety of lens styles, materials and manufacturers thereby offering the opportunity to choose the most appropriate lens for the job and offering total lens vendor independence.

Increased margin potential: Whether you choose to outsource your coating needs to iCoat or bring coating in-house, iCoat offers better margin potential every step of the way.

When you outsource your AR to iCoat, you have the advantage of controlling your own surfacing and finishing costs, providing your customers with the best AR choice and total freedom to choose any lens style, material or manufacturer; in addition to 24/7 coating production and computerized state-of-the-art job tracking.

When you license iCoat's premium AR technology you enjoy total lens vendor independence, customized on-site training, backup coating services, on-call technical expertise, equipment planning and implementation strategy support.
