

# Visual Fatigue?

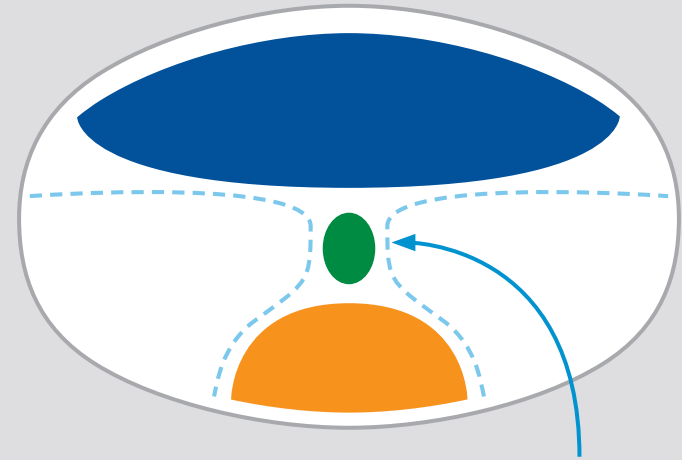

## Typical Single Vision Lens

No power boost to help reduce eyestrain during up-close activities such as reading

Distance power throughout lens

## Typical Progressive Lens

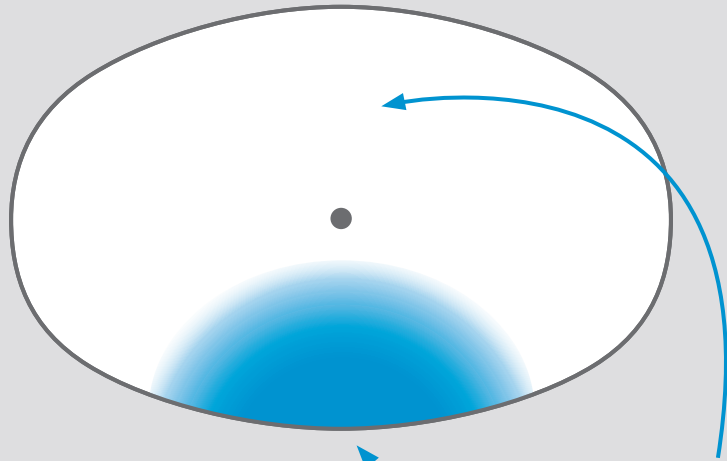

- Distance
- Intermediate
- Reading

Smaller intermediate area not designed for long-term computer and intermediate work

# Visual Relief!

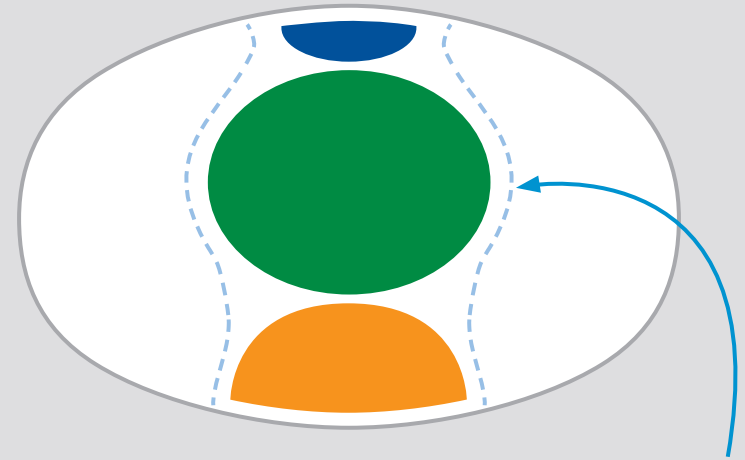

## Essilor Anti-Fatigue™ Lens

Slight power boost  
(+0.60D) for near work

Distance power  
for everyday wear

## Essilor Computer™ Lens

- Distance
- Intermediate
- Reading

Larger intermediate  
area creates a more  
relaxed, comfortable  
visual experience
