

# ICOAT – EXPERTS IN COMPLEX EDGING SERVICES

iCoat's fully automated edging and finishing lab, staffed with experienced teams of professionals and modern automated edging systems, is well versed in delivering complex edging and mounting jobs. From simple edging and mounting to intricate drill and notch mounts, edging complex bevels and high base curve jobs, iCoat's finishing department delivers to you all, fast and efficiently.

iCoat's state-of-the-art edging and finishing lab includes two automated and advance multi-tasking edging systems.

## Feature Advantages

- Automated and Accurate - Fast, flexible and accurate edging.
- Six Spindle Edging – Intricate lens surface processing (with base curves from 0 to 16 diopters) with accuracy.
- Complex Bevels - Ability to process complex bevels - T-bevels, Step (Shelf) bevels, straight bevels and inclined bevels.
- Smart Bevel Function – Automatically adjusts bevel position according to frame base and varying lens thicknesses.
- Intricate Finishing – Difficult edging jobs including lateral drilling, partial shelving for sport frames and high power, high wrap edging.
- 5-Axis Edging – Processing bevel, groove and drilling including most challenging shapes and wraps.
- Multi Tasking – Multi-tool cutting, AR edging, freeform edging and high luster polish.
