January 2014

NEW

Transitions® Signature™ VII

With Chromea7™ technology.

Introducing a **superior**
way to see the world.

More responsive to UV in more situations.

Transitions® Signature™ VII lenses replace Transitions® VI lenses as the optimal lens for maximum indoor clarity and responsiveness to UV outdoors. They offer full clarity indoors and just the right amount of tint outdoors. *Transitions Signature VII lenses are:*

**Preferred 2 to 1
over Transitions VI
lenses.**

The perfect opportunity
to **convert clear lens
wearers.**

More than 8 out of 10 clear lens
wearers rated *Transitions Signature
VII lenses better than their regular
clear lenses.*

A true molecular breakthrough.

Chromea7™
Technology

Our new technology, Chromea7™ is an exclusive dye formulation that allows the lenses to be more responsive in more lighting conditions across all temperatures. *Transitions Signature VII lenses are:*

More reactive to
indirect sunlight.

More reactive to
get even darker
on hot days.

Revolutionary testing for a
revolutionary product.

Transitions Signature VII lenses were developed to be more responsive in more situations using a new proprietary methodology – Life360™ – representing various temperatures, weather conditions and geographies. The result is lenses that are darker across an even wider variety of conditions.

**Tested in over 200
different real-life
conditions**
