

NEW

Transitions® XTRActive™

Now there's more than one type of Transitions lens. Because you have more than one type of patient.

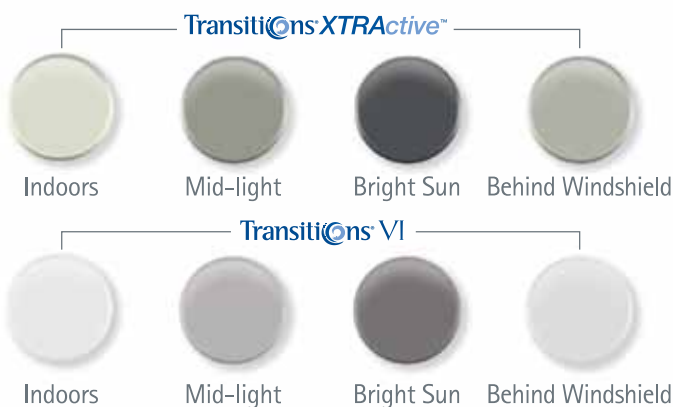

Now you can help even more patients find the Transitions® lenses that fit their lifestyles. Transitions® XTRActive™ lenses:

- Are the darkest everyday Transitions lenses available
- Are for patients who spend much of their day in bright, sunny conditions
- Have a slight tint indoors
- Activate moderately behind the windshield of a car

(Activation level is dependent on windshield shape/inclination and the position of the driver.)

With a few simple questions, you can identify who might prefer Transitions® VI lenses and who might prefer Transitions XTRActive lenses:

- Does your patient spend a lot of time outdoors? [If yes...](#)
- Does your patient spend a lot of time in very warm weather? [If yes...](#)
- Does your patient need a superior, darker tint outdoors? [If yes...](#)
- Does your patient prefer a slight tint indoors? [If yes...](#)
- This patient will most likely prefer Transitions XTRActive lenses. Otherwise, the patient should consider Transitions VI lenses.

Transitions®

Transitions® XTRActive™ Lenses Product Performance.

Introducing Transitions XTRActive lenses—an advanced offering and a new addition to the Transitions Optical family of brands. Transitions XTRActive lenses now offer some eyeglass wearers the extra darkness and slight indoor tint (83% light transmission or 89% light transmission with Anti-Reflective Coating at 73°F/23°C) they prefer, all while providing some activation in a car.
